

Copilot

Certainly! Let's delve into Agile and Scrum concepts, specifically tailored for automation QA interviews. I'll provide a set of questions and answers to help you prepare:

Agile and Scrum Interview Questions:

1. What is Agile methodology?

- **Answer:** Agile is an iterative and incremental approach to software development. It emphasizes collaboration, flexibility, and customer feedback throughout the development process.

2. What are the core principles of Agile?

- **Answer:**
 - Customer collaboration over contract negotiation.
 - Responding to change over following a plan.
 - Delivering working software frequently.
 - Individuals and interactions over processes and tools.

3. What is Scrum?

- **Answer:** Scrum is a specific Agile framework that organizes work into time-boxed iterations called sprints. It includes roles (Scrum Master, Product Owner, Development Team), artifacts (Product Backlog, Sprint Backlog, Increment), and ceremonies (Daily Standup, Sprint Planning, Sprint Review, Sprint Retrospective).

4. What is a Product Backlog?

- **Answer:** The Product Backlog is a prioritized list of features, enhancements, and bug fixes. It represents the work to be done in a project.

5. What is a Sprint?

- **Answer:** A Sprint is a time-boxed iteration (usually 1-4 weeks) during which the Development Team works on a set of backlog items. At the end of the Sprint, a potentially shippable product increment is delivered.

6. What is a Sprint Planning meeting?

- **Answer:** In Sprint Planning, the team selects backlog items to work on during the upcoming Sprint. They estimate effort, create tasks, and commit to delivering the selected items.

7. What is a Daily Standup (Scrum Daily)?

- **Answer:** The Daily Standup is a short daily meeting where team members share progress, discuss obstacles, and plan their work for the day.

8. What is a Sprint Review?

- **Answer:** The Sprint Review is held at the end of each Sprint. The team demonstrates the completed work to stakeholders, gathers feedback, and adjusts the Product Backlog as needed.

9. What is a Sprint Retrospective?

- **Answer:** The Sprint Retrospective is a reflection meeting where the team discusses what went well, what didn't, and identifies improvements for the next Sprint.

10. What is the role of a Scrum Master?

- **Answer:** The Scrum Master facilitates the Scrum process, removes impediments, and ensures the team adheres to Scrum principles.

11. What is the role of a Product Owner?

- **Answer:** The Product Owner represents stakeholders, defines requirements, prioritizes the backlog, and ensures the team delivers value.

12. What is the Definition of Done (DoD)?

- **Answer:** The DoD outlines the criteria that must be met for a backlog item to be considered complete. It ensures a consistent quality standard.

13. How does Scrum handle changes during a Sprint?

- **Answer:** Changes are not allowed during a Sprint. The team commits to the selected work, and any changes are deferred to the next Sprint.

14. What is the purpose of a Sprint Burndown chart?

- **Answer:** The Sprint Burndown chart tracks the remaining work in a Sprint. It helps the team visualize progress and adjust as needed.

15. How does Scrum promote transparency?

- **Answer:** Scrum artifacts (backlogs, charts) and ceremonies (meetings) ensure transparency by making information visible to all team members and stakeholders.

Remember to practice these concepts and explore more about Agile and Scrum to excel in your interview! Good luck! 🌟
